Grade 4 - California, A Changing State

The history of California is rich with ethnic, social, and cultural diversity; economic energy; geographic variety; and growing civic community. The study of California history in the fourth grade provides students with foundational opportunities to learn in depth about their state, including the people who live here, and how to become engaged and responsible citizens...Students will also learn to make claims (through writing and speaking) about sources and how to use textual evidence to support a claim...

...Through their studies, students understand the importance of people in supporting and driving this extensive growth and how the state became a magnet for migrants of all types. Teachers may want to introduce the concept of contingency (the idea that events in the past were not inevitable or preordained) to students: Did California's growth have to happen the way it did? What conditions fostered the state's rapid expansion? Students learn about the role of immigrants, including Latino and Filipino Americans, in the farm labor movement...In addition, students learn about the role of labor in agriculture and industry through studying teamsters and other labor unions...

...Students learn about other important developments in the push-and-pull of California's civil rights history during this period. During the economic collapse of the Great Depression, government officials and some private groups launched massive efforts to get rid of Mexicans and Filipinos in California, citing federal immigration law, the need to save jobs for "real Americans," and a desire to reduce welfare costs. The resulting repatriation drives violated individual civil rights. Scholars estimate at least one million Mexican nationals and Mexican Americans were deported from the United States to Mexico; approximately 400,000 of these were from California. Many who were illegally "repatriated" returned home during World War II, joining the armed services and working in the defense industry...

...New residents flooded California seeking work during and after World War II, establishing an increasingly heterogeneous population and laying the groundwork for important civil rights activism in the state. For instance, in agricultural labor, students can learn how Larry Itliong, Filipino farmworker labor leader, initiated the Delano Grape Strike. Students can also study how Cesar Chavez, Dolores Huerta, and the United Farm Workers, through nonviolent

tactics, educated the general public about the working conditions in agriculture and led the movement to improve the lives of farmworkers.
